

STATEMENT OF SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

As a company LITHIUM CHILE;

Will adhere to the sustainable development objectives of our mining projects. We are committed to acting responsibly throughout the development of our economic activities, social and environmental relationships and in our contribution to the development and preservation of our planet.

We will exercise social and environmental responsibility in our strategic decisions and in our daily activities. We agree to be held accountable for this by providing truthful information and communicating directly and appropriately with the parties involved.

We are committed to respecting the fundamental and legitimate rights of our associates. We will ensure that their material and moral interests are taken into consideration, when these are or may be affected by our business management behavior or by the activities of the companies with which we work.

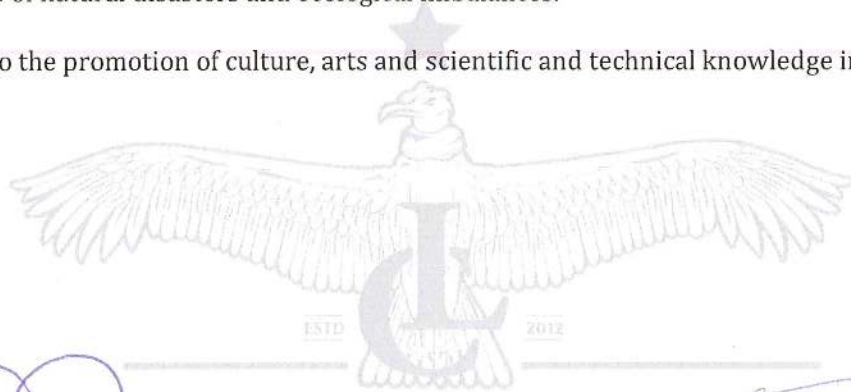

We see ourselves as stewards not only of the environment we work in but stewards of the Indigenous culture, traditions and way of life we will do our best to uphold and support.

With these in mind, we are especially committed to:

- Continuously improve conditions of employment, work and professional relations through the promotion of training and professional development.
- Ensure that all employees have hygienic and safe working conditions that are at least compliant with current legislation and, in all cases, decent sanitary infrastructure.
- Strictly comply with current legislation on exploration, mining, environmental and social issues.
- Protect the environment by implementing a framework dedicated to the protection of the natural environment, providing for the minimization of environmental impact, communication and cooperation with local and public authorities, raising the level of awareness and training of our employees and contractors.

- Reduce consumption of water, energy, raw materials and polluting or greenhouse emissions.
- Promote the use of renewable energy.
- Assess and minimize the environmental impact of our investment projects.
- Develop emergency plans to anticipate and mitigate accidental damage to the environment, human health and safety.
- Develop a social commitment by contributing to the human and economic development of the territorial communities where the company operates and improving the living environment of its neighbors.
- Encourage the employment and training of local employees at the company's work sites in accordance with their stage of development.
- Contribute, according to our capabilities, to any local initiative dedicated to the prevention or mitigation of the effects of natural disasters and ecological imbalances.
- Contribute to the promotion of culture, arts and scientific and technical knowledge in our field.
